

Home Sounds Composition Task

This composition task includes many different music composition techniques and representation. It will include the use of body percussion, found sounds, symbolic representation.

Step 1: Create Your Sounds

Using body percussion, your DIY instruments and/or objects found in your home, create 5 different sounds

Step 2: Notate Your Sounds

Give each sound a symbol and organize them onto a table like below. (Be creative here, and try to represent the sound with this symbol)

Clap	

Step 3: Organise Your Sounds on a graphic score.

Using your symbols, create and draw a single line pattern of symbols (perhaps four bars) using only one sound at a time. The sounds should be organised in a way that makes it possible for you to perform it. (for example - don't have clapping and clicking your fingers at the same time!) Organise your composition into a graphic score !

Step 4: Record Your Creation

Using the pattern that you created, practice performing it, and then record it when you feel secure. (Remember, you can have a couple of goes at this!)
